

TSN-880/770 Series Eyepieces

A new lineup of eyepieces has been created to match the advanced optical system of the TSN-880/770 Series. Due to the complex lens construction of these eyepieces, a new multi-coating is applied to increase the light transmission through the lenses and prevent the loss of light. The eyepieces are completely waterproof and filled with dry nitrogen gas.

Aspherical Lens

TE-10Z 20~60X

This high-performance zoom eyepiece has 10 lens elements in 6 groups and uses an aspherical lens to increase the field of view, which has traditionally been a drawback of zoom eyepieces. This design ensures a wide field of view through the entire zoom range and a flat field all the way to the edge of the lens. The newly developed optical design reduces the deterioration of the image at high magnifications.

TE-17W 30XW

This high-performance eyepiece design with 7 lens elements in 5 groups provides easy viewing with an eye relief of 20mm and field of view approximately 10% wider than conventional eyepieces. This wide field of view is extremely useful when searching for subjects that you want to bring into view. The 20mm eye relief allows you to see the entire field of view, even when wearing eyeglasses.

TE-20H 25XLER

This high-performance eyepiece design with 7 lens elements in 4 groups has an extremely long eye relief of 32mm. This extra eye relief is extremely useful when wearing eyeglasses or for a digiscoping system.
*Suitable for 4X zoom cameras and cameras with large-diameter objective lenses. Vignetting may not be eliminated in some cameras.

TSN-660/600 Series Eyepieces

A lineup of 4 eyepieces is available for the TSN-660/600 Series. The wide and long eye relief type eyepieces have a waterproof construction (only when mounted on a scope). The use of the TSN-EC3 allows these eyepieces to be used on the TSN-880/770 Series spotting scopes. (The magnification will change.)

Short Extension Ring

*Extends the length of the TSN-DA1/DA10 outer tube.

TSN-SS1

Zoom Extension Ring

*Necessary for TE-9Z zoom eyepieces.

TSN-LS2

Universal Mount Systems

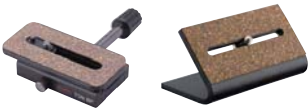

*When used with the TSN-881/883/771/773, the TSN-DA3-88A is required.

TSN-DA3 (For straight and angled spotting scopes)

*Cannot be used with angled spotting scopes.

TSN-DA3 st (For straight spotting scopes only)

Balance Plate

*TSN-DA3-88A is necessary to use the TSN-DA3 with the TSN-881/883/771/773.

TSN-BP TSN-DA3-88A

Universal Shoe

TSN-DA3-40

Photo Attachments

For TSN-880/770 Series

TSN-PZ TSN-PA6

Conversion Ring

*TSN-CR3 is necessary to attach the TSN-PZ/VA2B to TSN-660/600 Series.

TSN-CR3

Eyepiece Converters

*This converter allows the eyepieces of the TSN-820/820M Series to be used on the TSN-880/770 Series.

TSN-EC2

*This converter allows the eyepieces of the TSN-660/600 Series to be used on the TSN-880/770 Series.

TSN-EC3

*When the eyepieces of other spotting scope models are used with the TSN-880/770 Series, the specifications will change and optical performance may decrease.
