

HIGH LANDER Series

Its optical precision, exceptional brightness and ease of viewing are ideal for wildlife and astronomical observation. Top-Class Large Binocular

BL8J1
HIGH LANDER Normal Lens

Large 82mm Objective Lenses

BL8J3
HIGH LANDER PROMINAR
Fluorite Crystal

HIGH LANDER Series

This binocular allows you to comfortably observe wildlife or astronomical objects that require hours of stationary observation. The large 82mm lenses have excellent light-gathering power, providing a bright field of view with minimal distortion all the way to the edge of the lens.

High-End “PROMINAR” Model with Fluorite Crystal Lenses

The PROMINAR model (BL8J3) with pure fluorite crystal objective lenses is available for those seeking the highest optical performance.

Fully Multicoated Optics

All lenses, prisms, and dustproof glass are fully multicoated, ensuring a clear visual range and sharp images.

Durable and Functional Body

The strong yet lightweight die-cast aluminum housing is extremely durable, with a rigid structure that can endure tough use. The built in handle on the body provides an easy means of carrying.

Waterproof and Filled with Dry Nitrogen Gas

The housing is waterproof to JIS* Protection Class 7** and filled with dry nitrogen gas to prevent the lens from fogging.

*JIS=Japanese Industrial Standard.
**Not intended for use underwater.

Standard 32x Wide Angle Eyepieces

The eyepieces are designed to provide a wide field of view and long eye relief for comfortable viewing without eye fatigue.
