

**Brightness and Optical Performance
of the Highest Level in its Class**

TSN-660 Series

These high performance models are the perfect fusion of compactness and high optical performance. This series satisfies the needs of a wide range of users from beginning bird watchers to scientists and professional researchers.

66mm Objective Lens

The lens has more than 120% the light gathering capability of a 60mm objective lens, ensuring a bright field of view for observation.

High-End “PROMINAR” Models

The PROMINAR models (TSN-663/664) with XD objective lenses are available for those who seek higher optical performance.

Fully Multicoated Optics

All lenses, prisms, and dustproof glass are fully multicoated, ensuring sharp images and a clear visual range.

Compact and Lightweight Body

The compact body of the TSN-660 Series is equivalent in length to a 60mm class spotting scope, and weighing only 1kg (36 oz), the scope is extremely easy to handle and carry.

**Waterproof and Filled
with Dry Nitrogen Gas**

The housing is waterproof to JIS* Protection Class 7** and filled with dry nitrogen gas to prevent the lens from fogging.

*JIS=Japanese Industrial Standard.
**The scope is not intended for use underwater.

TSN-661 Normal lens Angled type

TSN-662 Normal lens Straight type

TSN-663 PROMINAR XD lens Angled type

TSN-664 PROMINAR XD lens Straight type

*Eyepiece sold separately.
