Corner Shot 40™

40mm Personal Grenade Launcher

Corner Shot 40™

CORNER SHOT 40™ system is a high-tech weapon system that enables military, law enforcement and security operators to effectively observe and engage targets from around the corner / behind cover, left, straight, right, up and down - without exposing any part of the operator's body and thus reducing the liability of the operator.

The new **CORNER SHOT 40™** is based on the outstanding features and capabilities of the original **CORNER SHOT™** system. The new version offers the increased firepower, extended range and enhanced cover fire of a 40mm grenade launcher. This system is also available to police and other law enforcement agencies in a 37mm version.

CORNER SHOT™ system is designed primarily for government & state organizations, military forces, law enforcement agencies, security services, etc.

The **CORNER SHOT 40™** can utilize a variety of 40mm caliber special-purpose projectiles, such as high-explosive grenades, smoke grenades, illumination grenades with parachute, less/non-lethal fragmentation projectiles, tear gas and OC (irritant) projectiles.
